

The F-Series diffuser was developed for freezers and can be fitted to existing or new equipment operating with frosted coils. The F-Series' design allows it to collapse when the unit goes into a heated defrost cycle. While the sleeve is down, the heat is being kept inside the unit speeding the thaw cycle time and reducing the amount of heat that would usually escape into the freezer.

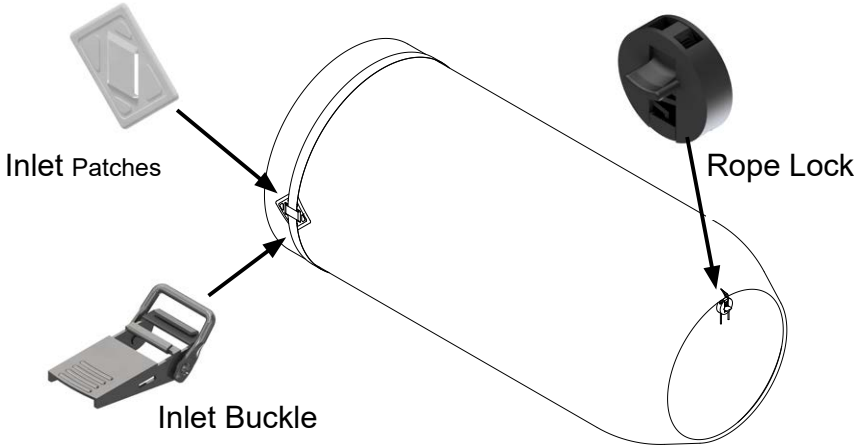

FEATURES & BENEFITS

- Low maintenance
- UL approved Air porous fabric will not condensate during operation
- Adjustable outlet eases field adjustment for lower flow conditions
- Reduced energy costs
- Helps coils thaw quicker resulting in lower defrost cycle time
- Reduces unintended product thawing in freezer

SPECIFICATIONS

- WEAVE: Fire Retardant Polyester
Filament/Filament Twill
- WEIGHT: 6.8oz/yd² (231g/m²)
- POROSITY: 2 CFM/ft² at 0.5" w.g. (10.2L/s/m² @125Pa)
- CODES: Classified by Underwriters
Laboratories in accordance with
the requirements of:
 - NFPA 90A
 - UL 2518
